# SMART SOFTWARE REMOTE CONTROL

Remote Control your Smart Client

## ENHANCE YOUR MILESTONE SOLUTION!

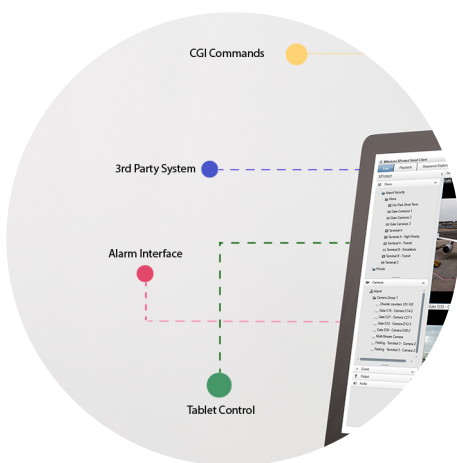

### Sometimes the customer needs a little bit more

The Smart Client is the most powerful VMS Client available. It provides a rich feature set to control your XProtect VMS.

Using the Smart Software Remote Control solution will give you the possibility to control every function from external sources. The included, easy to use SDK, allows you to control the Smart Client completely remote. 3rd Party System triggering Views or custom made control panels are just some examples of the powerful remote control Functionality.

Features:

- Complete remote control of the Smart Client
- Free SDK
- Easy 3rd party system integration
- Customized Control panels such as tablets
- Use one Smart Client to control the other
